

Gourav Kaushik

Computer Science Student · Fueling Ideas Into Code

Kaithal, Haryana, India | [linkedin.com/in/gourav-kaushik](https://www.linkedin.com/in/gourav-kaushik) | github.com/Gourav-Kaushik | GJUST, Hisar

■ Data Engineer · Artificial Intelligence Engineer

OBJECTIVE

Motivated Computer Science undergraduate at Guru Jambheshwar University of Science & Technology, passionate about transforming ideas into impactful solutions through data engineering, artificial intelligence, and cloud computing. Eager to apply technical skills in real-world environments and contribute to innovative, data-driven projects.

EDUCATION

Bachelor's Degree — Artificial Intelligence and Data Science

2026 – Present

Guru Jambheshwar University of Science & Technology (GJUST), Hisar

Artificial Intelligence and Data Science | Roll No: 250252800069

SKILLS

Programming Python

Cloud & DevOps Amazon Web Services (AWS), Microsoft Azure, Google Cloud, XAMPP

Version Control Git, GitHub

Data & Analytics Microsoft Excel (Advanced), Data Analysis

Design & Creative Figma, Canva, Adobe Premiere Pro

Productivity Microsoft PowerPoint, Microsoft Office Suite

CERTIFICATIONS & WORKSHOPS

One-Week Hands-on Workshop: Linux, Virtualization & Cloud Computing

Feb 23–27, 2026

Department of Artificial Intelligence & Data Science, GJUST, Hisar | AWS · Microsoft Azure · Google Cloud

Certificate No: AI&DS/2026/WS/14 | Organized by Dept. of AI & Data Science, GJUST

PROJECTS & ACTIVITIES

Friday-AI — Voice-Activated Python Assistant

Personal Project | Python · SpeechRecognition · pyttsx3 · webbrowser · Custom Modules

- Built a voice-activated Python assistant that listens for the trigger word "Friday" and executes spoken commands including opening websites and playing music.
- Implemented speech recognition and text-to-speech (TTS) using `speech_recognition` and `pyttsx3`, enabling seamless two-way voice interaction.
- Designed a modular architecture with a custom music library (`musiclibrary.py`) supporting song playback via YouTube links and a command processor for launching browsers and apps.
- Supports commands like "Open YouTube", "Open Google", and "Play [song name]", demonstrating applied AI and automation experimentation.

Habit Tracker Dashboard — Microsoft Excel

Personal Project

- Built a comprehensive monthly habit-tracking dashboard in Excel featuring daily completion tracking, percentage analysis, trend visualisation, and best/worst habit identification.
- Applied advanced Excel functions including conditional formatting, data visualisation, and formula-driven analytics.

Data Analytics Learning & Content Creation

LinkedIn Content Creator

- Actively share insights on data analytics, AI tools, and tech career strategies with 68+ followers on LinkedIn.
- Created educational content on practical data analytics approaches and avoiding common learning pitfalls.
